

iSummary: Summarize News Articles, Documents, Scans and more!

DESCRIPTION

Save your time! Concise summaries of your news, articles, documents and ideas!

Information overload is our reality. You try to keep up with everything going on around you but you don't have enough time. The solution is iSummary; algorithmically generated summaries of your saved articles using Artificial Intelligence and Natural Language Processing to extract the most useful information and present it in a beautiful format. You can save to iSummary from pretty much anywhere, including Safari, Twitter, Facebook, Flipboard, and Feedly, etc.

We care about your Privacy:

iSummary algorithm is available on your mobile device within the app. That means, we don't send your articles to a third party server and track what news you are currently reading. What you read and store on your app is none of our business!

HIGHLIGHTS

- Algorithmically generated summaries of articles, documents, scans, text, etc.
- Full text is available in a clean format. We strip away all clutter and save the content of web pages into iOS-optimized formatting.
- OCR functionality: iSummary can convert scanned image or photo to text and summarize it!
- Save to iSummary from other iOS applications with one tap.
- No monthly subscription! Once you get the app you own it and future updates are offered FREE of charge.

Intelligent Apps to Launch iSummary: Summarize News Articles, Documents, Scans and More

Raleigh, North Carolina - Intelligent Apps, LLC today is thrilled to announce the launch of their productivity app, iSummary. The new app is for obtaining quickly extracted summaries of news and other documents on your iPhone, iPad or iPod. The app aims to dramatically improve users' mobile news reading experience.

Many news apps leave users dissatisfied as it is difficult and time consuming to browse multiple stories, and many news articles are filled with filler content, making it necessary to read the full article to understand the concept. iSummary is developed to change this, making it possible for users to easily create condensed summaries from their favorite news outlets and scanned documents. *"Information overload is our reality,"* said Sam Aljamal, Intelligent Apps CEO. *"With so much information bombarding our minds on a daily basis, it can cause us to delay making decisions, or even make the wrong decisions".*

iSummary is a first of its kind solution and we have ensured it is the only one users need. The easy-to-use app automatically locates the most relevant facts in a story and generates short summaries that help the reader quickly grasp the main points from a document. To read the full story, readers can then tap on the "Get Full Text" button to get a clean, easy-to-view layout of the original article.

Beta users have already declared the new app as a great convenience: *"iSummary is extraordinarily convenient for digesting brief, accurate summaries,"* said Judy M. K.

iSummary enables users to:

- Save news articles from almost any app on their mobile devices including: web browsers, Facebook, Twitter, Medium, etc.
- Read summaries through the app both on and offline.
- Read full text in a clean format. The app removes all clutter and saves the content of web pages into iOS-optimized formatting.
- Convert scanned images into text and summarize!
- Share summaries with friends through social websites, SMS, and email.

- Easily navigate through innovative design and gestures.
- Read articles confidentially. Text summarization is in-app with no third party interference.

Device Requirements:

- * iPhone, iPad, and iPod touch device
- * Requires iOS 9.0 or later
- * Universal Application
- * 90 MB storage

Pricing and Availability:

iSummary 1.0 is \$2.99 USD (or equivalent amount in other currencies) and available worldwide exclusively through the App Store in the Productivity category.
